

BakedCake

Presentation

The Baked Cake token and its symbol BakedCake is the newest double rewards token and ecosystem on the BSC Chain. With an auto-liquidity and auto-buyback system, BakedCake token rewards holders in Bake & Cake simultaneously!

With our Dapp you can play games and stake your tokens and NFTs to win prizes and earn rewards. With weekly burns, anti whale systems and moonshot buybacks we are the next big thing on BSC. Don't miss out!

How it works

Rewards tokens are the new trend on BSC and we wanted to push the concept further by adding an automatic buyback which turns the BakedCake into a deflationary token. This means that there is less and less in circulation and therefore its rarity and value increases over time.

We have also added a feature that adds liquidity to the pool to allow for a more stable and less volatile token as it expands. To allow the development of our token and community we have also added a marketing fee.

Rewarding holders with the latest RFI contract on the Binance Smart Chain, Baked Cake has a 50/50 auto claim feature meaning Bake and Cake will automatically and gaslessly be farmed directly to your wallet without affecting the token price!

We also value the safety of our investors' funds above everything else. This is why we've taken the time to have our contract audited by Techrate.

NTF Ecosystem

The BakedCake token connects DeFi users together and offers a wide range of innovative tools for trading and creating your own DeFi projects. NFTs will be available for purchase and staking, with the tools available to mint your own unique NFTs! You can also play our cake themed games to gain more BakedCake!

We also value the safety of our investors' funds above everything else. This is why we've taken the time to have our contract audited by Techrate.

Launch and Tokenomics

The total number of tokens in circulation at launch will be 1 Quadrillion (1,000,000,000,000,000). This is broken down into the following:

Private sale 20%
Public 40%
Initial burn 20%
Giveaways & Rewards 10%
Marketing 10%

From the initial presale, 70% will be added to the liquidity pool and will be locked before launch. Anti-whale and anti-bot systems have been put in place to avoid botting, helping to make the launch as fair as possible. Thanks to buybacks and the purchase of lottery tickets we will also constantly burn tokens, helping to raise the price floor even further!

Tax fees explained

For each purchase, a 12% tax is levied. This 12% is divided as follows:

- 🥞 3% Rewarded in Bake
- 🐰 3% Rewarded in Cake
- 💰 2% Added to the Liquidity
- 🔄 1% Buy-backs
- 📱 3% Marketing and Outreach

For sales tax, we have added an extra 25% to help discourage early sales. The sales tax is as follows:

- 🥞 3.75% Rewarded in Bake
- 🐰 3.75% Rewarded in Cake
- 💰 3.5% Added to Liquidity
- 🔄 1.25% Buy-backs
- 📱 3.75% Marketing and Outreach

For a total of 15% tax fees on sales

Giveaways

We love taking care of our community, with 10% of our supply going towards giveaways, competitions and prizes for our BakedCake holders. There will be endless chances to gain rewards in Bake and Cake as well as other exciting prizes.

You can also use your BakedCake native tokens to take part in lotteries to win rare NFTs like the '0% buy and sell tax' exclusive NFT as well as many others!

\$Bake and \$Cake

We have been present in the BSC ecosystem since its inception and we have seen many projects launch only to be abandoned. Thankfully, we have also seen the launch of BakerySwap and PancakeSwap, they managed to develop a useful innovative product and create a strong community. If they are still thriving now we know there is a bright future for BSC.

This is exactly what we want to do with BakedCake. We are here to grow and prosper for the long term, to create a rich community and a strong project around the BakedCake token.

Rewarding holders with BAKE and CAKE tokens is a way for us to thank Pancakeswap and Bakeryswap for creating and participating in the success of the Binance Smart Chain. Our goal is like them, to participate in the success of the BSC.

Roadmap

Phase 1

Project Initiation

- >Website Launch
- >Smart Contract Development
- >Social Media Accounts
- >Poocoin Ads
- >Presale Marketing

Major Launch

- >Presale on Dxsale
- >PancakeSwap Listing
- >CMC & CG Listing
- >Influencer Marketing
- >Weekly Prize Giveaways

Empowering Community

- >Dextools Trending
- >CMC Trending
- >Reddit Trending
- >Viral Marketing

Global Marketing

- >Partnership with Popular-Swaps & Tokens
- >20k Holders
- >CEX Listing

Phase 2

Phase 3

BakedCake Full Platform

- >Public Release of Platform
- >BakedCake NFT Marketplace
 - >100k Holders
- >Further Games Developments

About Us

We are a core team of 5 cryptocurrency developers and investors, with decades of combined experience within the crypto world. We have been active on the BSC blockchain since its inception and have been able to participate in many projects as buyers, volunteers, moderators & creators.

We will dox ourselves as the project progresses.
